

AuraGold Pro v3.6 MT5

Official User Manual, Preset Specifications & Capital Resilience Guide

Welcome to AuraGold Pro Algorithmic Ecosystem!

This document serves as the official operational guide for the **AuraGold Pro v3.6** automated gold trading Expert Advisor on MetaTrader 5 (MT5). Please review this guide thoroughly before activating the EA on live trading accounts.

1. Multi-Layer Defense Architecture

AuraGold Pro is engineered specifically to master extreme **XAUUSD (Gold)** volatility. Unlike conventional grid/martingale robots that succumb to unilateral trend runs (*trend tsunamis*), AuraGold Pro deploys 9 coordinated safety barriers:

- **Smart Partial Close (De-Layering):** Automatically closes high-risk outer averaging layers at break-even during minor counter-trend pullbacks, releasing margin without waiting for the entire basket TP.
- **MACD Trend Guard (Layer 4+ Protection):** Freezes new averaging layers once position depth reaches Layer 4 or higher if higher-timeframe H1 momentum is violently against the basket.
- **Emergency Equity Guardian:** Hard capital stop-loss net (default 30-35%). In unforeseen black swan market crashes, the EA cuts loss automatically to safeguard 65-70% of account equity.
- **Dual Trend Filter (H1 + M1):** Strict Layer 1 alignment with dominant H1 macro trend (EMA 50 & 200) and triggered on M1 RSI pullbacks at overbought/oversold extremes.
- **Auto Economic Calendar Filter:** Automatically halts new entries 30 minutes before and after high-impact news releases (CPI, NFP, FOMC).
- **Dual MT5 Accounts License (Free Broker Switch):** Each license includes 2 MT5 trading accounts simultaneously with instant self-service broker switching via Member Portal.

2. MT5 Installation & WebRequest Setup Guide

1. Open MetaTrader 5, click **File** → **Open Data Folder**.
2. Navigate to **MQL5** → **Experts**, then copy `AuraGold_Pro.ex5` into this folder.

3. Navigate to **MT5** → **Presets**, then copy all `.set` files into this folder.
4. Restart MetaTrader 5 (or right click on Navigator → *Refresh*).
5. **Mandatory WebRequest Authorization:**
 - Click **Tools** → **Options** (or press `Ctrl + O`).
 - Select the **Expert Advisors** tab.
 - Check **Allow Algo Trading** and **Allow WebRequest for listed URL**.
 - Add the official verification URL to the list:
<https://auragold-ehq.pages.dev>
6. Open **XAUUSD** chart on **M1** timeframe.
7. Drag `AuraGold_Pro` from Navigator onto the XAUUSD M1 chart.
8. In the pop-up window, click **Inputs**, click **Load**, and select the appropriate preset for your balance.
9. Ensure the **Algo Trading** button on MT5 top toolbar is green (active).

3. Capital Recommendation & Pip Resilience Table

A. Cent Accounts (Exness Standard Cent / HFM Cent) — Small Balance

Deposit USD	Cent Balance (USC)	Recommended Preset	Base Lot	Pip Resilience	Risk Level
USD	5,000 USC	AuraGold_Cent_Tier1_UltraSafe_0.01.set	0.01	± 4,500 Pips	Ultra Low
USD	10,000 USC	AuraGold_Cent_Tier2_Conservative_0.02.set	0.02	± 5,000 Pips	Low (Recommended)
USD	20,000 USC	AuraGold_Cent_Tier3_Balanced_0.07.set	0.07	± 5,200 Pips	Balanced
USD	50,000 USC	AuraGold_Cent_Tier4_Growth_0.17.set	0.17	± 6,000 Pips	Growth

,000 USD	100,000 USC	AuraGold_Cent_Tier5_Aggressive_0.37.set	0.37	± 7,000+ Pips	High Yield
-------------	----------------	---	------	------------------	------------

B. Standard Accounts (USD) — Professional / Institutional

Deposit Range	Recommended Preset	Base Lot	Max Layers	Pip Resilience	Drawdown Target
,000 - ,000	AuraGold_Supreme_UltraSafe_0.01.set	0.01	5 Layers	± 3,500 Pips	< 8.5%
,000 - ,000	AuraGold_Supreme_Conservative_0.02.set	0.02	5 Layers	± 4,200 Pips	10% - 12% (Proven 2025/2026)
,000 - ,000+	AuraGold_Supreme_Growth_0.03.set	0.03	5 Layers	± 5,500+ Pips	12% - 15% (+506% Verified)
